DETAILED ACTION

This office action is in response to the Appeal Brief received on 7/03/2006.

Applicants' Appeal Brief, and the arguments for patentability of pending claims contained therein, have been carefully studied by the examiner. All pending claims and all prior art of record have been thoroughly reconsidered, and the previous grounds of claim rejection discussed in the Final Office Action are hereby withdrawn.

Allowable Subject Matter

Claims 1-33 are allowed.

The following is an examiner's statement of reasons for allowance:

As pointed out in the Appeal Brief, none of the prior art fairly teaches or suggests an optical waveguide device containing all the structural elements claimed in the instant application in a single embodiment (see Appeal Brief, pages 5, 8-15). While Sigalas (US Patent 6,560,006) does disclose various structural elements and features similar to the claimed elements and features of the instant application, there is no apparent motivation why one of ordinary skill in the art would pick and choose known elements of the prior art devices to arrive at exact combination of claimed elements and features of the instant application, *absent* the disclosure of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
